

- Uma célula viva com menos de 2 vizinhos morre.
- Uma célula viva com mais de 3 vizinhos morre.
- Uma célula viva aparece quando tem 3 vizinhos vivos exatamente.

```
matriz[i][j] = (int) (Math.random () * 1.5 );  
// o Math . random gera um número em [0,1] , multiplicando por 2/3 conseguiremos 2/3 das casas com zeros e 1/3 com 1s  
// o (int) transforma o double obtido em inteiro
```

Figure 1 displays five 10x10 grids, each containing a different pattern of stars. The stars are represented by small black dots, and the background is white. The patterns are as follows:

- Grid 1 (Leftmost):** Stars are located at (row, column) coordinates: (1,4), (1,5), (1,6), (1,7), (1,8), (2,4), (2,5), (2,6), (2,7), (2,8), (3,4), (3,5), (3,6), (3,7), (3,8), (4,4), (4,5), (4,6), (4,7), (4,8), (5,4), (5,5), (5,6), (5,7), (5,8), (6,4), (6,5), (6,6), (6,7), (6,8), (7,4), (7,5), (7,6), (7,7), (7,8), (8,4), (8,5), (8,6), (8,7), (8,8), (9,4), (9,5), (9,6), (9,7), (9,8), (10,4), (10,5), (10,6), (10,7), (10,8).
- Grid 2:** Stars are located at (row, column) coordinates: (1,4), (1,5), (1,6), (1,7), (1,8), (2,4), (2,5), (2,6), (2,7), (2,8), (3,4), (3,5), (3,6), (3,7), (3,8), (4,4), (4,5), (4,6), (4,7), (4,8), (5,4), (5,5), (5,6), (5,7), (5,8), (6,4), (6,5), (6,6), (6,7), (6,8), (7,4), (7,5), (7,6), (7,7), (7,8), (8,4), (8,5), (8,6), (8,7), (8,8), (9,4), (9,5), (9,6), (9,7), (9,8), (10,4), (10,5), (10,6), (10,7), (10,8).
- Grid 3:** Stars are located at (row, column) coordinates: (1,4), (1,5), (1,6), (1,7), (1,8), (2,4), (2,5), (2,6), (2,7), (2,8), (3,4), (3,5), (3,6), (3,7), (3,8), (4,4), (4,5), (4,6), (4,7), (4,8), (5,4), (5,5), (5,6), (5,7), (5,8), (6,4), (6,5), (6,6), (6,7), (6,8), (7,4), (7,5), (7,6), (7,7), (7,8), (8,4), (8,5), (8,6), (8,7), (8,8), (9,4), (9,5), (9,6), (9,7), (9,8), (10,4), (10,5), (10,6), (10,7), (10,8).
- Grid 4:** Stars are located at (row, column) coordinates: (1,4), (1,5), (1,6), (1,7), (1,8), (2,4), (2,5), (2,6), (2,7), (2,8), (3,4), (3,5), (3,6), (3,7), (3,8), (4,4), (4,5), (4,6), (4,7), (4,8), (5,4), (5,5), (5,6), (5,7), (5,8), (6,4), (6,5), (6,6), (6,7), (6,8), (7,4), (7,5), (7,6), (7,7), (7,8), (8,4), (8,5), (8,6), (8,7), (8,8), (9,4), (9,5), (9,6), (9,7), (9,8), (10,4), (10,5), (10,6), (10,7), (10,8).
- Grid 5 (Rightmost):** Stars are located at (row, column) coordinates: (1,4), (1,5), (1,6), (1,7), (1,8), (2,4), (2,5), (2,6), (2,7), (2,8), (3,4), (3,5), (3,6), (3,7), (3,8), (4,4), (4,5), (4,6), (4,7), (4,8), (5,4), (5,5), (5,6), (5,7), (5,8), (6,4), (6,5), (6,6), (6,7), (6,8), (7,4), (7,5), (7,6), (7,7), (7,8), (8,4), (8,5), (8,6), (8,7), (8,8), (9,4), (9,5), (9,6), (9,7), (9,8), (10,4), (10,5), (10,6), (10,7), (10,8).

- 1) Construtor, que inicializa a matriz;
- 2) imprimeTabuleiro();
- 3) int contaVizinhos( int i, int j);
- 4) int [][] iteracao();
- 5) void simulaVida ( int quantidade ); // chamado a partir do main.
